

How to submit your post-lab activity answer code to Gradescope.

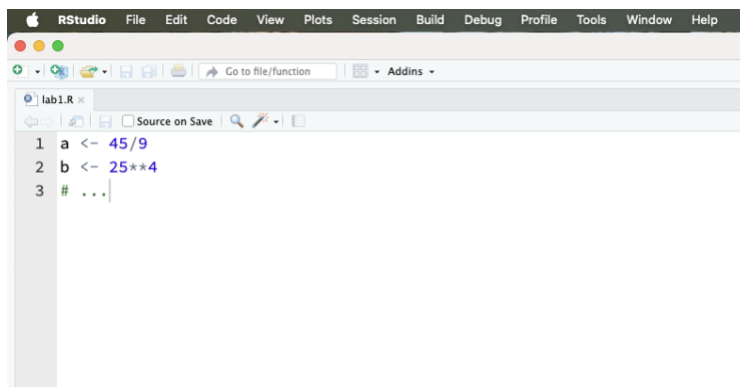

1. Create your R script file.

In Rstudio, create a new R script file by
going to “File” ⇒ “New File” ⇒ “R Script”

Shortcut : simply `Cmd` + `Shift` + `N` in mac, `Ctrl` + `Shift` + `N` in Windows & Linux

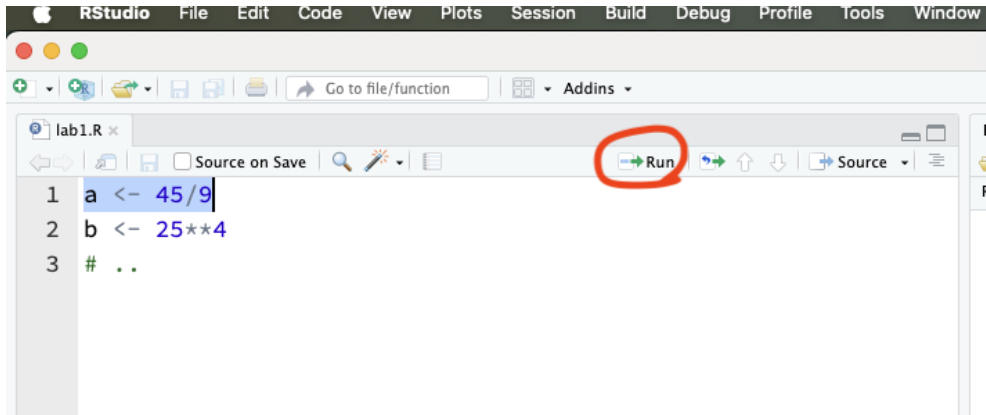

2. Write your answer code

3. Check if your R file (all the lines) can be executed.

How to run each line?

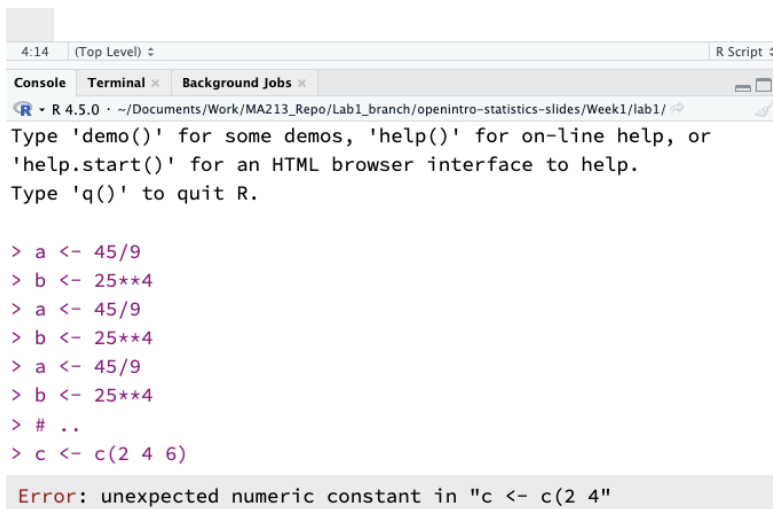

By highlight the line(s) you want to run and click 'Run'.

Or `cmd` + `return` in Mac, `ctrl` + `enter` in Windows

Note that if your R file cannot be executed (i.e., is not runnable), Gradescope will be unable to grade your submission.

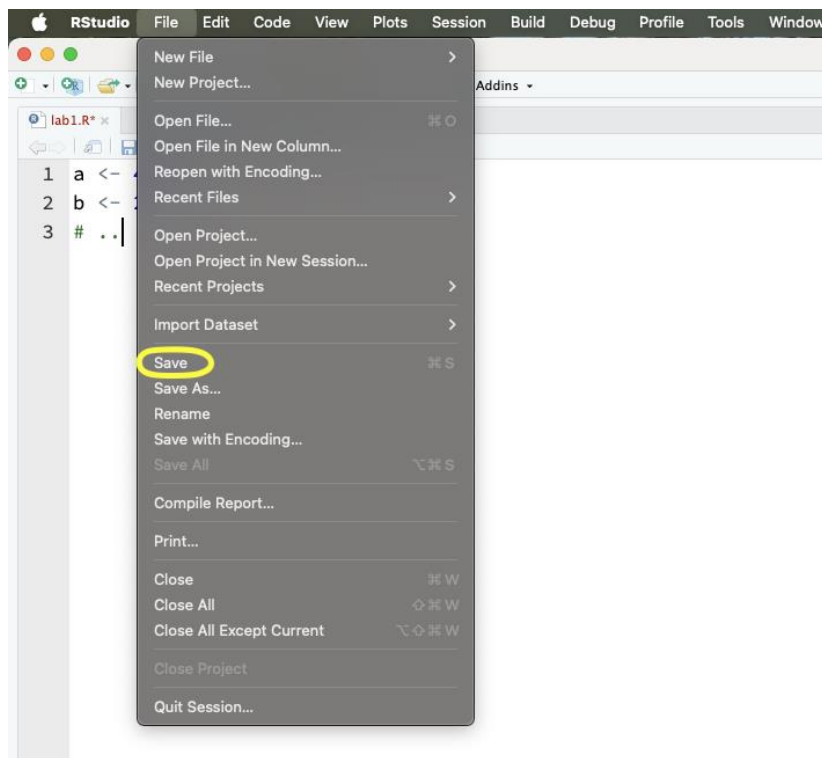

For example,

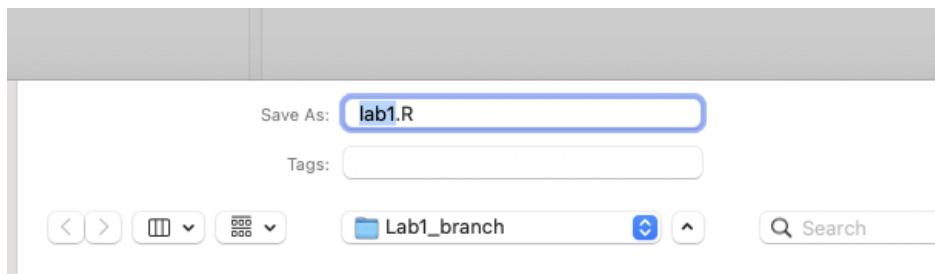

This case, Gradescope will not grade your file.

So, please check your R file before you submit to Gradescope.

4. Save it.

“File” ⇒ “Save” and name it “lab1.R”

Please save the file name using all lowercase letters as "lab1". The extension must be ".R" with a capital letter "R". Note that R is case sensitive.

Note that '#' in R is a comment symbol, and everything following it on the same line is not executed in R.

5. Submit in Gradescope.
